

Spanky's Portable Services Green Practices

At Spanky's Portable Services, we continually strive to be good stewards of the environment. We support sustainable building practices that go beyond energy and water conservation to incorporate environmentally sensitive products and processes in our sanitation services. We support LEED practices, or Leadership in Energy and Environmental Design, a "green building" rating system developed by the U.S. Green Building Council. Due to these practices, Spanky's has been able to control cost and show our customers some key benefits such as:

- Lower electric and water utility costs.
- Environmentally effective use of cleaning materials.
- Enhanced health and productivity.
- Long-term economic returns.
- Reduced environmental impact.
